Sponsorship Value Proposition

- By building a network of researchers from diverse fields, including life sciences, biotechnology, computer science, mathematics, and statistics, across more than 20 countries worldwide, sponsors can enhance their customer base and improve their brand image within the life sciences sector.
- Promoting your company's image among researchers working with bioinformatics data in experimental biology, systems/synthetic biology, and computational biology—including fields like genomics, transcriptomics, proteomics, metabolomics, and microbiomes—can also help attract top talent when recruiting for the company.
